South Carolina 07.03.1973:

On their family farm, several witnesses sighted this strange object as it floated in the sky towards them. As it got closer, the craft emitted a high-pitched whine before disappearing into the clear blue sky.

Las Lunas, New Mexico 09.24.1972:

A farmer in Las Lunas, Mexico, returning to town, spotted several small objects "fluttering" along a few dozen feet above the desert scrub. They were small, about three feet in diameter, silver in color and made a buzzing sound. Similar domed disc-shaped objects were seen and photographed in the same area about five years later.
